

Available Assessments

Mend uses the terms "Forms" and "Assessments" interchangeably to refer to paperwork a patient or other user completes in your Mend portal.

While we are happy to create custom assessments to match your organization's paper forms at a per-page fee, we also offer the following standard clinical assessments and boilerplate intake forms free of charge.

NOTE

If you would like us to automate a form not listed here, please consider the following:

- 1.** Some assessments are copyrighted, and require a license for clinical use and/or automation. If you are requesting to automate a copyrighted clinical assessment or an intake form designed for use by another organization, please be prepared to provide us with documentation expressing permission from the copyright owner.
- 2.** If the scoring mechanism for a new clinical assessment is more complex than a sum or average of response values, our team may require extra time to automate the form, and there may be a custom development fee. If this is the case, we will reach out to you to discuss and confirm the expected timeline or limitations involved with building the automatic scoring, or the alternative option of creating the form without automatic scoring.
